

Feeder 15166

September 3, 2024

RE: Important Notice of Restoration from the 200-400 blocks of Orange Street, SE

Dear Resident(s),

We're informing you that the District of Columbia Powerlines Underground (DC PLUG) Initiative's Feeder 15166 is nearing the completion of its civil construction phase. Consequently, our dedicated contractors will soon begin milling and paving restoration work in your neighborhood.

Milling and paving restoration work is scheduled to begin on September 5, 2024, and continue until September 13, 2024, weather permitting. Construction will take place Monday through Saturday, from 7:00 am to 7:00 pm.

During this period, all traffic will be rerouted to accommodate the large equipment needed for the operation. ***The detour route is as follows: from 5th and Orange Street, make a right onto Oakwood Street and then a left onto 2nd Street, SE.***

We kindly ask for your cooperation in avoiding street parking in the affected areas. We understand this may cause some inconvenience, but relocating vehicles promptly will help us complete the work more efficiently. Please adhere to the No Parking and Detour signs posted in the area. If the weather allows, this phase of restoration is expected to take about eight (8) workdays.

We appreciate your patience and understanding as we work to enhance the reliability and resilience of the District of Columbia's infrastructure.

Warm regards,

Ann Walters

DC PLUG Community Outreach Coordinator
